

*Warehouse terminal of JSC*  
*“Pushkinskaya Ploshchad*  
*Printing Plant”*

*The “A” grade warehouse complex  
is located in Moscow near  
Pechatniki metro station.*

# “A” grade warehouse complex

- Favorable location of the warehouse is characterized by the immediate vicinity to the extended infrastructure of the city, with convenient drives from the highways.

# “A” grade warehouse complex

- Separately designated railway branch enables receiving and dispatching the products by the railway transport, which significantly cuts expense for delivery of the products.

Dispatch windows located along the whole perimeter allow serving fast a considerable amount of vehicles with different loading capacity.

The shelf storage is made as the seven-eight storey cell type with the possibility of placing the pallets different in size. The stacks are 12 meters high, the warehouse floor coating is applied by the dust-free floor technology. All stacks are equipped with the collision protection, which reduces the risk of damaging the stacks with the storage equipment.

The warehouse complex is designed for 7 500 pallets. Total area of the storage facilities of the warehouse terminal is 6000 m<sup>2</sup>. The warehouse is equipped with the modern storage equipment, with the use of the narrow passage technology “CROWN”. The WMS-system with application of bar coding and bin location storage is installed in the warehouse. The warehouse complex is monitored by the security staff on a round-the-clock basis, both physically and with video surveillance.

The warehouse complex complies with all standards of the modern “A” grade warehouse complex and is aimed at providing the full, quality and advanced service package of processing and safe custody of cargoes according to the client’s preferences
